PROFILE

I am a highly motivated and goal-driven person, fully equipped with leadership and technical skills. I am looking out for opportunities to work in challenging and competitive environments where I can enhance my expertise and gain other relevant skills as well.

WORK EXPERIENCE

Al Nafey group

<https://farmhouse2.vercel.app/>

- I designed and developed a professional website for Al Nafey Group (www.alnafeygroup.com), a business providing multiple services. The project included the creation of two main pages: Home and Services. My responsibilities included layout design, UI/UX structure, mobile responsiveness, and ensuring a clean and modern interface aligned with the brand identity. The final result was a user-friendly, visually appealing, and functional website that enhanced the client's online presence.

Farmhouse AL Nafey group

<https://farmhouse1.vercel.app/>

- I created a clean and functional website for Swiss Haven Farmhouses (www.swisshavenfarmhouses.com), focusing on user engagement and simplicity. The project included two main pages: Home and Booking. A custom logic was implemented to allow users to connect directly via WhatsApp, streamlining the booking and inquiry process. The site was built with a user-centric design approach, ensuring smooth navigation, responsiveness across all devices, and a seamless user experience for potential customers.

Quran Art

<https://farmhouse-sigma.vercel.app/>

- I designed and developed a fully responsive Home Page for Quran Art, focusing on a clean and elegant layout that reflects the beauty and significance of Islamic calligraphy and design. The website was built to ensure seamless viewing across all devices, including mobile, tablet, and desktop. Special attention was given to typography, spacing, and aesthetic balance to create a visually engaging user experience while maintaining performance and fast loading speeds.
